I. Our Story

About Us

We at Adasoft strongly believe that better results can only be achieved when those charged with governance have the complete information about their business readily available, easily accessible, and on time. We are a product company, developing and distributing innovative software solutions that help our clients do their daily routines with a smile.

Our Motto

Our motto is “Single Click Away”, which means that we are developing and distributing intelligent solutions and all the information that our clients are searching for is easily accessible and comes right on time.

The Foundation

The company was founded in 1993 by Ms. Eleonora Bilbileva, who holds a Master’s degree in Electronics and is a Certified Public Accountant, and Ms. Zorka Panayotova, who holds a Master’s degree in Economics and a diploma in Accounting.

Initially, our company started distributing and implementing a Payroll system; shortly after that it proceeded with another accounting system. Twenty-five years later, the companies behind those products are still our partners and we are their main representative in the country.

The Name and the Brand

We are registered as ADA-SOFT Limited. Nevertheless, our brand is Adasoft. You will find information about us either under the registration name or the brand.

As the company was founded by two ladies, they decided that it would be a token of pride to name it after Augusta Ada Byron, daughter of the famed British poet Lord Byron. Better known as Ada Lovelace, she was a brilliant mathematician, recognized as the first software developer in the world who wrote the first computer program. If interested, you could find more information about Ada [here](#).

Our Mission, Vision and Goals

Our mission is straight-forward: deliver simple yet intelligent software products that are of great value to the people who use them.

Having dedicated ourselves to improving the lives of our clients, we strive to improve with each new day. Our goal is to revolutionize the market and provide our client with total solutions, so that they can become the biggest players in the market.

What Makes Us Different

We at Adasoft regard our clients as our partners. We are fully aware that no two clients are alike even though they might work in the same economic sector. That is why our company’s policy is to apply individual approach to each client and each project. We assign an employee who is responsible for each client. In this way, whenever you call us, you will not need to explain everything from scratch: we already know your business.

It's common knowledge that optimized business processes inevitably reduce costs and improve efficiency, effectiveness, and quality. Hence, we develop and distribute flexible solutions that can be tailored in accordance with your specific business needs. At Adasoft we are continuously adopting new technologies and practices to foresee future demands and accelerate your business processes by using the most appropriate software products and techniques.

Adasoft is a reliable partner – we are at your disposal whenever you need us. Your success is our best advertisement. Most of our clients hear about us not through some large-scale advertising campaigns, but from colleagues who work with us and express strong approval and satisfaction of our service.

Why Choose Us? Adasoft in Numbers.

25 years of experience – since 1993.

98.5 % client satisfaction rate.

0-day we start working on your issues the very day they are reported. More than 90% of the cases are resolved on the same day.

24/6 dedicated support. You have a person in our company who knows your business.

5.5K+ happy clients. Among them are SMEs and big manufacturing enterprises, ministries and other government entities, universities, academic institutions, municipalities and many more.

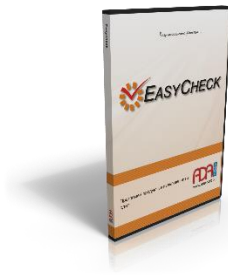

We Speak Your Language

We speak Bulgarian, English, Spanish, French, and German.

Doors Open Days

You are welcome every day. Come and meet our friendly staff who are always ready to answer your questions.

Our Main Products

AuditDesktop – Auditing software

EasyCheck – Auditing software

EasyCheck FMCS –Financial Management and Control System

Scripter(i) – Enterprise Resource Planning System (ERP)

Teres – Payroll and HR software

Equa Control – Compares and Consolidates Financial Reports and Trial balances

Equa .Net – Report Submission System

Prime Cost – Software for calculating the prime cost of the production

Statistics – Hospital statistics (developed for one of our clients)

Cashbook – Cashbook

II. The People Behind the Company

Eleonora Bilbileva – CEO and Partner

After she graduated as an Engineer in Electronics from the Technical University in Sofia, Eleonora started her career as a computer supervisor in the “Calculation Data Centers” in Pazardzhik, a city in South-West Bulgaria. In addition, she gained a lot of experience training people as a teacher in the military school situated in the same city.

She set up her own company called Bilnorday in 1990 and started distributing and implementing Teres, a great Payroll and HR software product. During that time, she earned her second Master’s degree in Accounting and Controlling.

She met Zorka Panayotova and together they founded Adasoft. During the 25 years that followed, Eleonora managed many teams and projects, implementing Accounting, Auditing, ERP, and Payroll software.

She was certified as a Public Accountant in 2004 and ever since has been participating in great many audits as an Auditor and a Partner.

Zorka Panayotova – CFO and Partner

Zorka holds a Master's degree in Economics from the University of National and World Economy in Sofia. She has gained a lot of experience as a Chief Accountant and HR director in one of the biggest clothing manufacturers in the region (2500 employees). Founding the company in 1993, she combined her substantial expertise in Economics, Accounting, and Management with the IT knowledge of Eleonora to deliver high-quality services to their clients. Soon after founding they transform the company from startup to the most recognizable market leader in the region. As a Team leader and Chair of the company's office in Pazardzhik, Zorka is responsible for the marketing and implementation of company's products and services for the whole region. She has a lot of experience implementing our solutions for a high scale project both in private and public sector. Currently, Zorka is our CFO and HR Director.

Marin Bilbilev – CBD0 and Partner

Marin started working in the company while still studying at the New Bulgarian University in Sofia. His first position was advertising and implementing the Accounting system. By that time, he was responsible for the software implementation in the entire region. Five years later he joined the development team and developed some of the company's most recognizable software products: Opal 2005, The Equa Series products, Statistics as well as a few other smaller projects. These products are innovative and have no competitors in the region, hence they are used by thousands of happy clients. Having worked 11 years for the company during which he finished several successful projects, Marin became a Managing Partner. Today his core responsibilities include Adasoft's the business development, partner network, and software implementation.

George Panayotov – CTO and Partner

George is our Chief Technology Officer and the Head of our Research and Development Department. He holds a Master's degree in Maths and IT from Sofia University "St. Kliment Ohridski". After joining Adasoft he developed highly-valued products such as Primecost, Pharmacy, bDocs, Cashbook, and Opal X.

As Head of our R&D Department, George is the main person behind Adasoft's flagship product – the worldwide recognized audit software AuditDesktop.

Today his core responsibilities include the continuous development of the company's products, the company's security policy as well as discovering and testing new technologies, so that we can offer our clients the best possible solutions.

III. Our Services

Adasoft is a product company, hence our services are related to the implementation and the support of our products. In addition, we offer trainings, consultations, information system auditing, business process analysis and optimization.

We strive to understand the business needs of our clients so that we can provide them with the right solutions to address their goals.
